Section 1: Introduction

About Our School Community

Royal Canadian College, located at 8610 Ash Street, Vancouver, BC is an independent school that serves approximately 60 students from the Metro Vancouver area, particular from the municipalities of Vancouver, Richmond and Burnaby. The school offers a secondary school program (8-12).

Our leadership team includes a Principal, and Senior Administrator, 4 teaching staff, and 3 support/non-teaching staff.

Royal Canadian College is certified by the British Columbia Ministry of Education and Child Care and is incorporated as a non-profit organization. Our school authority is Royal Canadian College Society and is governed by a Board which establishes policies and the direction of Royal Canadian College.

A Message from the Principal

At Royal Canadian College, we are committed to providing a learning and working environment that supports all students and staff and provides equitable opportunities to support our diverse community. A key element to supporting our community is the development of a Three-Year Accessibility Plan. This plan identifies system needs, priorities, and action plans, and draws on feedback from our school community and the work of the Accessibility Committee to enhance equity of access to programming and our facilities.

Our Accessibility Committee, AMS Accessibility Advisory Committee (formed for AMS of FISA BC member schools, which we are part of), is a diverse and multi-disciplinary team that meets regularly to affirm our commitment to identify priorities and develop and monitor action plans highlighted in the Three-Year Accessibility Plan. The plan identifies measurable actions across the pillars of the Accessibility Act, supporting equal opportunity for persons with disabilities by identifying, removing, and preventing barriers of access.

We recognize the importance of accessibility not only for those with disabilities, but also for the benefit of the entire community. We are committed to advancing the efforts of the Accessibility Committee to improve equity and ease of access to services, as well as access to our facilities. Through the actions in this Three-Year Accessibility Plan, we commit to continuous improvements in developing an environment that supports all students, staff and the larger school community.

Territorial Acknowledgement

Royal Canadian College is grateful to be on the shared, unceded territory of the x^wməθk^wəy^əm (Musqueam), S^kwx^wú7mesh (Squamish), and səlilwətał (Tsleil-Waututh) People. We respect and commit to a deep consideration of their history, culture, stewardship, and voice.

Definitions

Accessibility: The state of having programs, services and environments that allow all individuals to participate fully in society without encountering barriers.

Accessibility Committee: An official group formed by one or more organizations in collaboration with people with disabilities, to create an accessibility plan and feedback mechanism.

Accessibility Plan: A plan developed by an Accessibility Committee that identifies challenges and solutions for addressing accessibility barriers.

Barrier: Anything that hinders the full and equal participation in society of a person navigating needs or disabilities. Types of barriers in the educational setting:

- 1. Learning Barrier:** any barrier that limits or prevents learning, whether it is through inadequate engagement, representation of the content, or expression of ideas and communication.
- 2. Architectural and Physical Barrier:** A barrier resulting from building design, the area adjacent to the building, shape of rooms, the size of doorways, lack of accessibility features, blocked paths of travel, and so on.
- 3. Attitudinal Barrier:** A barrier that arises from the attitudes of staff, students and the school community, including discriminatory behaviours and a lack of disability awareness.
- 4. Policy or Practice Barrier:** Rules, regulations and protocols that prevent a person from performing their job satisfactorily or participating in society. Policy, practice, and procedures that prevent a student from accessing the curriculum and fully participating in the school community.
- 5. Resource Barrier:** Barriers resulting from inadequate technology, funding, staff, or tools.
- 6. Temporal Barrier:** Barriers that occur during a specific time, such as busy times

of day or during special events.

Disability: The state of being unable to participate fully and equally in society as a result of the interaction between an impairment and a barrier. ([For more information about disability and types of disability and support, refer to Appendix A: Disabilities.](#))

Impairment: A physical, sensory, mental, intellectual, cognitive limitation, whether permanent, temporary or episodic.

Section 2: Framework Guiding Our Work

The Royal Canadian College accessibility plan builds on global, national, provincial and Royal Canadian College specific actions to promote and support accessibility.

Global Context – United Nations

In recent years, there has been an emphasis on increasing diversity, equity and inclusion within the workplace and within the larger community. The United Nations has been instrumental in leading the importance of disability as a global health issue. In 2006, the United Nations led efforts to adopt the Convention on the Rights of Persons with Disabilities (CRPD). In 2010, Canada ratified the CRPD and described the CPRD as follows:

“The Convention on the Rights of Persons with Disabilities is an international human right treaty aimed at protecting the rights and dignity of persons with disabilities without discrimination and on an equal basis with others. Parties to the Convention of the rights of Persons with Disabilities are required to promote and ensure the full enjoyment of human rights of persons with disabilities including full equality under the law.”

Canadian Context and Legislation – Canadian Charter of Rights and Freedoms

Canada-wide, around one in five people had some form of disability in 2017. Nationally, Canadian accessibility legislation started in 1985 where disability was included in the Canadian Charter of Rights and Freedoms and in 1986, Persons with Disabilities (PWDs) were included in the new federal Employment Equity Act. The Accessible Canada Act (ACA) came into force in 2019, with the overarching goal to realize a barrier-free Canada by 2040. This act applies to federally regulated entities. The ACA has seven focus areas, and was developed based on the following guiding principles:

1. All persons must be treated with dignity regardless of their disabilities.
2. All persons must have the same opportunity to make for themselves the lives that they are able and wish to have regardless of their disabilities.

3. All persons must have barrier-free access to full and equal participation in society, regardless of their disabilities.
4. All persons must have meaningful options and be free to make their own choices, with support if they desire, regardless of their disabilities.
5. Laws, policies, programs, services and structures must take into account the disabilities of persons, the different ways that persons interact with their environments and the multiple and intersecting forms of marginalization and discrimination faced by persons.
6. PWDs must be involved in the development and design of laws, policies, programs, services and structures.
7. The development and revision of accessibility standards and the making of regulations must be done with the objective of achieving the highest level of accessibility for PWDs.

B.C. Context and Legislation - Accessible B.C. Act

The Accessible British Columbia Act, enacted in June 2021, and initially the accessibility planning requirements only applied to provincial government organizations.

The Accessible British Columbia Regulation, under the Accessible British Columbia Act, came into force on September 1, 2022. These regulations identify schools as accessible organizations, and school districts and independent schools will be required to have an Accessibility Committee, an Accessibility Plan, and a tool to receive feedback on accessibility by September 1, 2023:

The goal of the act is to improve opportunities for people with disabilities and involve them in identifying, removing, and preventing barriers to their full participation in the life of the province.

Principles in the Accessible B.C. Act:

The Accessible B.C. Act includes a list of principles that must be considered as organizations develop an accessibility plan. The Definitions are adapted from the foundational document [BC Framework for Accessibility Legislation](#).

- 1. Adaptability:** Accessibility plans should reflect that disability and accessibility are evolving concepts that change as services, technology, and attitudes change.
- 2. Collaboration:** Promoting accessible communities is a shared responsibility and everyone has a role to play. Accessibility plans should create opportunities for Organizations and communities to work together to promote access and inclusion.
- 3. Diversity:** Every person is unique. People with disabilities are individuals with varied backgrounds. Individual characteristics including race, gender, sexual orientation, religion, and lived experience greatly inform the experiences of individuals. Accessibility plans should acknowledge the principle of intersectionality and the diversity within the disability community.
- 4. Inclusion:** All British Columbians, including persons with disabilities, should be able to participate fully and equally in their communities.
- 5. Self-Determination:** Accessibility plans should seek to empower people with disabilities to make their own choices and pursue the lives they wish to live.
- 6. Universal Design:** The Centre for Excellence in Universal Design defines Universal Design as “the design and composition of an environment so that it can be accessed, understood, and used to the greatest extent possible by all people regardless of their age, size, ability or disability.” An accessibility plan should be designed to meet the needs of all people who interact with the Organization.

Our Commitment to Accessibility:

Accessibility refers to the degree of ease with which people with disabilities can use and enjoy something such as a device, service, or place. At Royal Canadian College, we are committed to providing an environment that is accessible and practical for all members of our diverse community. We recognize the importance of conscious planning, design, and effort in ensuring that barriers are removed and accessibility is increased.

Our school is committed to working collaboratively with the community to provide equitable treatment to people with disabilities in a way that respects their dignity. To achieve this goal, we have outlined the following commitments:

- Engage with staff, community members and people with disabilities in the development and review of its accessibility plan.
- Ensure that our school authority policies and procedures align with the principles of accessibility.,
- Improve access to facilities, policies, programs, practices, and services for students, staff, parents/guardians, volunteers and community members.
- Continually improve accessibility for people with disabilities in our school community. disabilities.

Our Approach:

At Royal Canadian College, we believe that all members of our community have the right to be treated with dignity, given an opportunity to participate, and provided with access to learning and community. Our approach is grounded in the core provincial principles of accessibility, including adaptability, collaboration, diversity, inclusion, self-determination and universal design.

As a member of AMS (Associate Member Society of FISABC), the AMS Accessibility Advisory Committee (AAAC) will help our school recognize the gaps and opportunities to improve accessibility in our school community.

Section 3: The Accessibility Committee

Purpose of the Accessibility Committee

Under the Accessible B.C. Act, organizations must establish an Accessibility Committee to assist with identifying and preventing barriers to individuals in or interacting with the organization. The purpose of the accessibility committee is to work collaboratively to assess and improve community accessibility, focusing on the experiences of individuals with disabilities while encompassing the whole community. The Accessibility Committee also advises the school Administrator/Board on strategies to reduce social, physical, sensory and other barriers that prevent people from fully participating in all aspects of school community life.

Recruitment to the Accessibility Committee

Under the Accessible B.C. Act, the selection of accessibility committee members must, to the extent possible, align with the following goals:

- At least half the members are persons with disabilities (PWD), or individuals who support or are from organizations that support PWDs;
- At least one member is an Indigenous person; and
- Members reflect the diversity of persons in B.C.

The AAAC of the AMS, which Royal Canadian College is a member, has the diverse representation as outlined above.

Section 4: Consultation Conducted

Barrier-identification Methodologies

The following barrier-identification methods:

Methodology	Description	Status
Audit of policies and practices	A review of current policies and practices that promote accessibility and inclusion was conducted by key staff members.	Sep 2023
Survey to Staff	An accessibility and inclusion survey was developed and distributed to staff.	Sep 2023
Survey to Parents/Guardians	An accessibility and inclusion survey was developed and distributed to parents/guardians.	Sep 2023
School Physical Accessibility Audit	An Assessment of School Physical Accessibility was developed. An audit team was identified, and they conducted the School Physical Accessibility Audit.	Sep 2023
Accessibility Feedback Tool	A feedback tool was developed and made available to stakeholders. Information about the tool was shared with school stakeholders (i.e., students, staff, outside professionals and parents/guardians).	Sep 2023

Section 5: Accessibility Feedback Tool

Royal Canadian College developed a feedback tool that included a series of questions about accessibility experiences that students, staff and members of the school community could complete. The tool was made available to all stakeholders and an information announcement about the tool was provided to students, staff and parents/guardians. Feedback could be anonymous, or people could add their name and contact information if they wished to be contacted. There was also an option for people to upload a video, voice recording or photo(s).

The following are the contents of the online Accessibility Feedback Tool.

Report an Accessibility Barrier or Support

At Royal Canadian College, we want to learn about specific barriers or helpful supports that people encounter when they are trying to:

- Access a school program, building, or school information
- Receive a service or support

The Royal Canadian College Accessibility Committee will review your feedback (monthly/quarterly) and will be used for the revision of future accessibility planning. If you need an accommodation for your student or if this is an urgent matter, please contact the school directly.

1. Please provide the date the barrier or support was experienced.
2. Please select the location the barrier or support was experienced.
3. What were you or someone you know trying to access?
4. Accessibility barrier or support details (be as specific as possible).
5. Do you have any recommendations for what would make it better?
6. Attach files if you wish to provide additional information (e.g., video, voice recording, photos)
7. Do you wish to be contacted about your responses? Yes No

If yes, please provide your name and email or phone number. Responses will be checked monthly.

Thank you for providing your valuable feedback!

Section 6: Accessibility Accomplishments and Barriers

Key Discussion Themes – Accessibility Accomplishments Identified

The guiding principles of inclusive practice inform Royal Canadian College programs, policies, practices, and services to reduce and minimize barriers to accessibility for people with disabilities. We strive to create an environment that is accessible and to ensure continuous improvement in accessibility.

There are a number of initiatives at Royal Canadian College to identify, remove and prevent barriers for people with disabilities. The following is a synopsis of some of the major achievements noted in the feedback:

Learning

1. Students with diverse needs and disabilities are included in regular classes.

Equity

1. Shared information on the accessibility act with school staff, students and parents/guardians.
2. Updated Anti-discrimination Policy, and staff are trained and equipped to deal with discrimination and equity issues that arise.

School Policies and Practices

1. Mental Health and Well-being Supports
 - The school recognizes the importance of mental health and well-being of its students and staff, especially as the world has experienced the COVID-19 pandemic and its effects. Initiatives have taken place to assess and improve the mental health and well-being of students and staff to ensure support and positive outcomes.
 - Training programs are offered to staff to promote student mental health and improve personal mental health and well-being and reduce stigma associated with mental illness.
2. Accessibility Awareness Training

- Ongoing training continues to be provided to staff and students that supports accessibility awareness, obligations, and inclusive environments.

Physical and Architectural Environment

1. The school conducted a Physical and Architectural Environment Audit.
2. The school has invested in several repairs and upgrades to existing facilities to new standards that support accessible school communities. Repairs have been conducted on the basketball court, including the resurfacing of uneven areas. Investments have been targeted to upgrade washroom and play area accessibility.

Key Discussion Themes – Accessibility Barriers Identified

Learning Barriers

1. Educators do not consistently allow for alternative ways for students to represent their learning.
2. Some community members identified that it was difficult to navigate the school website and to locate information they hoped to access.

Physical and Architecture Environment Barriers

1. The telephone system in the school does not support those with hearing impairments.
2. Some larger spaces within the school have sound echo issues.

Resource Barriers

1. Teachers and students are not familiar with the accessibility features on school computers such as voice to text, text to voice, web readers and other features.

Section 7: Our Three-Year Plan (2023-2026)

Overview:

This Accessibility Plan outlines the measures Royal Canadian College will take to remove and prevent barriers and to promote inclusion for individuals with disabilities in our school community. The plan is based on the Accessibility Principles of Adaptability, Collaboration, Diversity, Inclusion, Self-Determination, and Universal Design, as set out in the Accessible B.C. Act.

Accessibility Priorities:

Based on the feedback gathered from staff, parents/guardians, and students, and the Physical and Architectural Environment Audit, the Accessibility Committee has identified the following areas as the top priority for improving accessibility in the school community.

Priority #1: Learning

Royal Canadian College will enhance the accessibility of access to learning for all individuals, including those with disabilities, through the following actions:

Objectives	Actions	Timeline
Ensure that all communication to staff, students, and parents/guardians is written in plain language and is available in alternate formats upon request	<ul style="list-style-type: none">• Survey parents/guardians to determine their preferred method of communication and format• Develop guidelines and examples for communication to all stakeholders	Feb 2024

Develop a consistent method for teachers to convey information about homework	<ul style="list-style-type: none"> Convey homework assignments digitally (Through Google Classroom) that is accessible to students, parents/guardians and inclusive education staff 	Feb 2024
Develop and implement a clear and easy-to-navigate school website.	<ul style="list-style-type: none"> Conduct a school website audit Create a website improvement plan 	June 2024

Priority #2: Physical and Architectural

Royal Canadian College will improve the accessibility of the physical and architectural environment for all individuals, including those with disabilities through the following actions:

Objectives	Actions	Timeline
Develop a standard for hearing impairment related accessibility issues	<ul style="list-style-type: none"> Explore means to improve accessibility to the telephone system for the hearing disabled. 	February 2024
Provide alternative learning spaces for students with diverse needs and disabilities	<ul style="list-style-type: none"> Determine the current needs of students who may require alternate learning spaces from time to time 	June 2024
	<ul style="list-style-type: none"> Conduct an audit of current alternate learning spaces that can meet the identified needs 	June 2024
	<ul style="list-style-type: none"> Create a plan and budget for the provision of additional alternative learning spaces or accommodations to address the needs identified 	June 2024

Priority #3: School Policy and Practice

Royal Canadian College will review and revise policies and practices to ensure they align with the principles of accessibility, and to address any identified gaps in staff training or knowledge on accessibility issues.

Objectives	Actions	Timeline
Summarize and celebrate current accessibility practices within the school.	<ul style="list-style-type: none"> Conduct an audit of school accessibility practices and summarize the results 	March 2024
	<ul style="list-style-type: none"> Provide information to staff about current accessibility practices within the school and examples 	March 2024
Identify areas needed for further staff training on accessibility issues	<ul style="list-style-type: none"> Develop priorities for staff accessibility training and develop or identify training modules for staff 	March 2024
	<ul style="list-style-type: none"> Develop an implementation plan to provide the accessibility training needed for current staff and new staff induction 	March 2024

Priority #4: Resources

Royal Canadian College will increase awareness and training on assistive technology for students with disabilities.

Objectives	Actions	Timeline
Increase awareness of specific assistive technology needs for	<ul style="list-style-type: none"> Conduct class reviews of technology needs for students 	June 2024

students with disabilities	<ul style="list-style-type: none">• Provide training for staff on the various technology needs of students	June 2024
----------------------------	--	-----------

Section 8: Monitoring and Evaluation

The Accessibility Planning Committee meets (quarterly) to review progress and evaluate the effectiveness of the plan's implementation and plan for increased accessibility throughout the school. The committee will ensure the following steps are taken regarding the Three-Year Accessibility Plan:

1. Prepare an annual status report on the progress of the measures taken to implement the plan.
2. Review and update the Three-Year Accessibility Plan every three years in consultation with persons with disabilities and other relevant community members.

Section 9: How to Give us Feedback

In addition to the public availability of the plan, Royal Canadian College will continue to publish an annual status report on the progress of the Three-Year Accessibility Plan. Accessible formats of the plan will be made available upon request. Questions, comments or feedback regarding the Accessibility Plan may be directed to: Mr. Jeffry Yip (by email: info@royalcanadiancollege.com)

Section 10: Appendices

Appendix A: About Disability

The Disability Continuum

Although there is no universally accepted meaning for the word "disability". However, the Ontario Human Rights Code provides definitions of disability that form our guiding principles. Definitions of disability can be placed on a continuum. At one end, disability is explained in terms of medical conditions (medical model). At the opposite end, disability is explained in terms of the social and physical contexts in which it occurs (environmental model).

The medical model focuses on deficiencies, symptoms and treatments. The World Health Organization's (WHO) 1976 definition for disability, for example, is "any restriction or lack (resulting from an impairment) of ability to perform an activity in the manner or within the range considered normal for a human being." Medical model definitions promote the idea that disability is a deviation from the norm.

Many people with disabilities are troubled by definitions that regard disability as abnormal, preferring instead to portray disability as commonplace, natural, and in fact, inevitable. As people age, they experience gradual declines in visual acuity, auditory sensitivity, range of motion, bodily strength and mental powers. Significant functional limitations affect almost half of people between the ages of 55 and 79, and over 70% of people over 80 (World Health Organization (WHO) report titled "Ageing and health", 2015). Beyond middle age, disability is the norm.

The environmental model explains disability in relation to social and physical contexts. In this view, the environment, not an individual's medical condition, causes disability. For example, during an electrical blackout, a person who is completely blind can effortlessly navigate around the home, hammer nails, and, if a Braille user, read a novel.

A sighted person would be unable to perform these tasks easily, if at all. In this example, the environment disables the sighted person.

The environmental model emphasizes that people with disabilities are capable individuals, and it is the barriers in the built and human environments, not their medical conditions, that create disability. Disability occurs when the world is designed only for a certain way of living, without considering the natural variation among human beings. Barriers are created by humans, and modifying how we live, the tools we use, and our understanding of the proper way to do things can eliminate or minimize design problems that cause barriers. Systematic barriers can be eliminated by modifying policies, plans, and processes. Attitudes that cause barriers can be addressed through disability awareness, respect, and positive interactions with people with disabilities.

Types of Disability and Functional Limitations

A person's disability may make it physically or cognitively challenging to perform everyday tasks such as operating a keyboard, reading a sign, differentiating colours, distinguishing sounds, climbing stairs, grasping small items, remembering words, or doing arithmetic.

There are many kinds of disabilities, including physical, sensory, hearing, mental health, developmental and learning. Disabilities can be visible or invisible.

Visual Disabilities

Visual disabilities reduce one's ability to see clearly. Very few people are totally blind. Some have limited vision such as tunnel vision, where a person has a loss of peripheral or side vision, or a lack of central vision, which means they cannot see straight ahead. Some can see the outline of objects while others can see the direction of light. Impaired vision can restrict a person's ability to read signs, locate landmarks or see hazards. In some cases, it may be difficult to tell if a person has a visual disability. Others may use a guide dog or white cane.

Here are some suggestions to help you interact with people with visual disabilities:

- Identify yourself when you approach the person and speak directly to them.
- Speak normally and clearly.
- Avoid referring to the disability or using phrases like "handicapped".
- Unless it is an emergency, only touch the person if you have been given permission.

- If you offer assistance, wait until you receive permission.
- Offer your arm (the elbow) to guide the person and walk slowly.
- Service animals are working and have to pay attention at all times. Refrain from engaging with the animal.
- If you're giving directions or verbal information, be precise and clear. For example, if you're approaching a door or an obstacle, say so. Don't just assume the individual can't see you.
- When entering a room, show the individual to a chair, or guide them to a comfortable location.
- Identify landmarks or other details to orient the person to the environment around them.
- Ensure you say good-bye prior to leaving the individual.
- Be patient. Things may take a little longer.

Hard of Hearing and Deafness

People who have hearing loss may be deaf or hard of hearing. Like other disabilities, hearing loss has a wide variety of degrees. People who are hard of hearing may require assistive devices when communicating. While some people may use sign language, notes or hearing aids when communicating, others may also use email, pagers, TTY telephone service or Bell Canada Relay Service.

Here are some suggestions to help you interact with people who are deaf or hard of hearing:

- Always ask how you can help. Don't shout.
- Avoid referring to the disability or using phrases like "handicapped".
- Attract the person's attention before speaking. The best way is a gentle touch on the shoulder or gently waving your hand.
- Make sure you are in a well-lighted area where the person can see your face.
- Look at and speak directly to the person. Address the person, not their interpreter.
- If necessary, ask if another method of communicating would be easier, for example a pen and paper.

- Keep your face clearly visible when speaking.
- Be clear and precise when giving directions and repeat or rephrase if necessary. Make sure you have been understood.
- Service animals are working and have to pay attention at all times. Refrain from engaging with the animal.
- Any personal (e.g., financial) matters should be discussed in a private room to avoid other people overhearing
- Be patient. Communication for people who are deaf is different because their first language may not be English. It may be American Sign Language (ASL).
- If the person uses a hearing aid, try to speak in an area with few competing sounds.

Physical Disabilities

There are many types and degrees of physical disabilities and not all require a wheelchair. For example, people who have arthritis, heart or lung conditions, or amputations may also have difficulty moving, standing or sitting. It may be difficult to identify a person with a physical disability.

Here are some suggestions to help you interact with people with physical disabilities:

- Speak normally and directly to the person rather than someone who is with them.
- People with physical disabilities often have their own ways of doing things. Ask before you help.
- Avoid referring to the disability or using phrases like “handicapped”.
- Be patient and be sure you understand their needs.
- Unless it is an emergency, refrain from touching any assistive devices, including wheelchairs.
- Provide the person with information about accessible features of the immediate environment (automatic doors, accessible washrooms, etc.).

Intellectual Disabilities

People with intellectual or developmental disabilities may have difficulty doing many things most of us take for granted. These disabilities can mildly or profoundly limit one's ability to learn. You may not be able to know that someone has one of these disabilities unless you are told, or you notice the way people act, ask questions or body language.

Here are some suggestions to help you interact with people with intellectual disabilities:

- As much as possible, treat the person with an intellectual disability like anyone else. They may understand more than you think, and they will appreciate you treating them with respect.
- Don't assume what a person can or cannot do.
- Avoid referring to the disability or using phrases like "handicapped".
- Use simple words and short sentences.
- Make sure the person understands what you've said.
- If you can't understand what's being said, ask again.
- Give one piece of information at a time.
- Be polite and patient.
- Speak directly to the person, not to someone who is with the person.

Learning or Cognitive Disabilities

Learning or cognitive disabilities can result in a host of different communications difficulties for people. They can be subtle, as in having difficulty reading, or more pronounced, but they can interfere with the person's ability to receive, express or process information. You may not be able to know that someone has one of these disabilities unless you are told, or you notice the way people act, ask questions or body language.

Here are some suggestions to help you interact with people with learning disabilities or disabilities:

- Patience and a willingness to find a way to communicate are your best tools.
- Recognize that some people with communication difficulties use augmentative communication systems such as Signed English and Picture Exchange System.
- When you know that someone with a learning disability needs help, ask how you can best help.
- Speak normally and clearly, and directly to the person
- Take some time — people with some kinds of disabilities may take a little longer to understand and respond.
- Try to find ways to provide information in a way that works best for them. For example, have a paper and pen handy.
- If you're dealing with a child, be patient, encouraging and supportive.
- Avoid referring to the disability or using phrases like "handicapped".
- Be courteous and patient and the person will let you know how to best provide service in a way that works for them.

Mental Health Disabilities

People with mental health disabilities look like anyone else. You won't know that the person has a mental health disability unless you're informed of it. But if someone is experiencing difficulty in controlling their symptoms or is in a crisis, you may need to help out. Be calm and professional and let the person tell you how you can best help.

Here are some suggestions to help you interact with people with mental health disabilities:

- Treat people with a mental health disability with the same respect and consideration you have for everyone else.
- Be confident and reassuring and listen to persons with a mental health disability and their needs.
- If someone appears to be in a crisis, ask him or her to tell you the best way to

help.

- Take the person with a mental health disability seriously, and work with them to meet their needs.

Speech and Language Disabilities

Some people have communication challenges. It could be the result of cerebral palsy, hearing loss, or another condition that makes it difficult to pronounce words, causes slurring or stuttering, or not being able to express oneself or understand written or spoken language. Some people who have severe difficulties may use communication boards, sign language or other assistive devices.

Here are some suggestions to help you interact with people with speech and language disabilities:

- Just because a person has one disability doesn't mean they have another. For example, if a person has difficulty speaking; make no assumption they have an intellectual disability as well.
- If you don't understand, ask the person to repeat the information.
- Avoid referring to the disability or using phrases like "handicapped".
- If you are able, ask questions that can be answered 'yes' or 'no'.
- Take some time. Be patient and polite and give the person whatever time they need to get their point across.
- Allow the individual to finish their sentences themselves without interruption.
- Patience, respect and a willingness to find a way to communicate are your best tools.

Deaf-Blind Disabilities

A person who is deafblind cannot see or hear to some extent. This results in greater difficulties in accessing information and managing daily activities. Most people who are deafblind will be accompanied by an intervener, a professional who helps with communicating. Interveners are trained in special sign language that involves touching the hands of the client in a two-hand, manual alphabet or finger spelling, and may guide and interpret for their client.

Here are some suggestions to help you interact with people who are deafblind:

- Make no assumptions about what a person can or cannot do. Some deaf-blind people have some sight or hearing, while others have neither.
- Avoid referring to the disability or using phrases like “handicapped”.
- A deaf-blind person is likely to explain to you how to communicate with them or give you an assistance card or a note explaining how to communicate with them.
- Speak directly to the person, as you normally would, not to the intervener.
- Identify yourself to the intervener when you approach the person who is deaf-blind.
- Don’t touch service animals – they are working and have to pay attention at all times.
- Unless it’s an emergency, refrain from touching a deaf-blind person without permission.
